

Michael J. Hagan Arena, Saint Joseph's University

SJU Men's Basketball Head Coach Phil Martelli states:

“The sound system was extraordinary. It was crystal clear.”

St. Joseph's in 2009 held their first game in their newly constructed 17,700-sf Fieldhouse that houses state-of-the-art facilities for men's and women's basketball.

Expansion of the Fieldhouse increases in capacity by at least 1,000 seats to make a 4,200 seat arena. The renovation adds a concourse, broadcast booth, larger offices and locker rooms, a Hall of Fame room, study rooms, basketball center, and practice facilities. Seven-hundred seats were added to the student section which puts the total at 1,700 and makes this part of the arena even more intimidating for opposing teams.

Technology Services:

- Streaming Video
- Electronic Signage
- Video Display Wall
- Arena Audio
- Arena Lighting
- Multi-Use Presentation and Arts Venue
- Voice / Data Coordination and Structure Cable
- Infrastructure Designs & Planning
- Technology Master Planning
- Program and Scope Development
- Architectural Coordination and Planning
- Broadcast / Communications
