

Dorrance H. Hamilton Academic Building, Thomas Jefferson University

“Jefferson’s new educational facility, with its associated campus green, will be the “new heart of the campus,” setting the standard for Jefferson’s educational vision and for its interaction with the surrounding community,” says Thomas Jefferson University President

This will allow the institution to “define the future of clinical care” where medical, nursing and other health profession students learn to work together as multidisciplinary teams and to educate more health care professional students as well as medical students, the university president said.

The six story, 136,000 square feet, state of the art academic building houses a technologically advanced auditorium, small and large group classrooms, and a two floor clinical skills center featuring a virtual diagnostics and surgical suites.

Collaboration with the faculty and the systems users were key in the development of the technology. Central control rooms and shared resources, along with campus connectivity, will give this facility cost effective flexibility and growth capabilities into the future.

Technology Services:

- A/V System Designs
- Specialty Teaching Technologies Designs
- Videoteleconferencing & Media Designs
- Communications Design
- \Media System and Media Retrieval, Design
- Broadcast System Designs
- Voice / Data Coordination and Structure Cable, Infrastructure Designs & Planning
- Broadband Distribution System Design
- Fiber Connectivity
- Program through CD Development
- Architect and Facility Coordination
- Technology Construction Administration
- Technology Documentation
